

Amendments to the Drawings

On September 9, 2005 Applicant submitted a copy of the above-referenced application together with a drawing as recognized by the U.S. Patent Office (i.e., the drawing filed on September 9, 2005 are listed in the Notice of Acceptance). However, Applicant has noticed that the U.S. Patent Office failed to include the single drawing in the publication of the above-referenced application (US20070107808). As a result, Applicant is enclosing a new copy of the drawing to ensure that the figure is included in the file. Applicant respectfully submits that no new matter is introduced as the drawing was part of the original filing and was also included in the copy of the international application from which this application claims priority.

Enclosure:

New Copy of Figure 1.
